

## the million pence bike ride

### The Challenge:

In August a group of friends will be embarking on a monumental 1100 mile cycle ride from Barcelona to Birmingham to raise money for **Brain Tumour UK**. Our goal is to get ourselves safely back to Birmingham in 10 days.... an ambitious (some might say stupid) 110 miles a day!

We will be funding the trip ourselves so every penny raised will go straight to a really worthy cause! We have set ourselves the mammoth goal of raising £10,000 so anything you can afford, however big or small would be so gratefully received.

### My personal story:

A few years ago my Dad, John Bulteel, was diagnosed with an inoperable brain tumour and sadly passed away within months of diagnosis. More devastating than the thought that we may lose someone we love was watching the speed at which the brain tumour affected the things that meant so much to him. A passionate teacher, tennis and hockey player very quickly lost his speech and the use of the right side of his body, which he never regained.

Hopefully the brilliant work and research done by **Brain Tumour UK** will lead to improved prognoses and standard of life for those diagnosed with brain tumours.
